ECCO GOLF BIOM[®] C5

- ECCO Performance Leather from ECCO's own tanneries is combined with a new, super-stretchy knitted sock and sporty print details
- Specially-developed golf leather is easy to maintain and clean and is highly scuff-resistant.
- GORE-TEX SURROUND[®] for 100% waterproof protection and 360-degree breathability.
- BIOM[®] NATURAL MOTION[®] Technology brings you closer to the ground for stability, control and walking comfort
- Removable and washable insole for long-term cushioning, with the option of taking it out for extra width
- The new BIOM C5 outsole delivers performance stability and multi-directional traction in every part of the course and in all conditions, including wet, dry, sand and mud.
- Comes in lace or BOA[®]

FEATURED TECHNOLOGIES

ECCO BIOM[®] NATURAL MOTION[®] is based on the natural shape and movement of the foot. Its key element is an anatomical last, created from the knowledge gained from studying 2,500 individual foot-scans. Add to that a low-to-the-ground construction, reduced seam and easy flexibility that allows you to move with ease and efficiency at tee-off – and several hours later.

ECCO FLUIDFORM[™] Direct Comfort Technology is a state change process where a fluid, lightweight material is injected into a shoe mould to form a solid, shock-absorbent sole. Using our proprietary state-of-the-art lasts – engineered to deliver both high levels of comfort, following the anatomy of the human foot, and contemporary, versatile styles – FLUIDFORM[™] provides an exceptional fit-and-feel that stands in stark contrast to the hard, flat sole parts of conventional shoemaking techniques. Together with this fine-tuned balance of cushioning and rebound, FLUIDFORM[™] also ensures an integral, supple bond between the upper and the sole, without any glued or stitched assemblies, which leads to reliability and durability that is sure to stand the test of time.

LYTR TECH LYTR TECH.

Ultra-light, state-of-the-art foam supplies outstanding, game-changing rebound softness and light weight. ECCO's new LYTR Foam, made from an advanced bounce and rebound material is embedded in the sole via the signature ECCO FLUIDFORM[™] Direct Comfort Technology.

The foam is seamlessly combined in the midsole with ECCO's soft PHORENE[™], which provides contoured comfort, stability and a longlasting integral bond to the leather upper.

For superior comfort and performance, each zone – the forefoot, midfoot and heel – has targeted amounts of the two materials.

ECCO DYNAMIC TRACTIONS SYSTEM[™] (E-DTS) is an award-winning hybrid outsole design that provides more than 800 traction angles for excellent grip in all playing conditions. Constructed from highly durable, wear resistant Thermoplastic Polyurethane (TPU) and consisting of approximately 100 moulded traction bars, the sole unit is extremely lightweight, flexible and shock absorbing. Its low profile brings the golfer closer to the ground for great stability, ground feel, traction and swing power.

E-TTS

THE ECCO TERRA TRACTION SYSTEM (E-TTS) delivers optimal traction, durability, and stability for all aspects of your golf game. The multi-angle traction outsole provides excellent grip in all playing conditions, while the large flat surfaces ensure a strong ground feel as you walk the course - or anywhere else.

ECCO-TEX

The **ECCO-TEX** waterproof membrane offers a breathable, waterproof environment that will keep your feet dry and comfortable in wet conditions.

GORE-TEX SURROUND[®] is engineered to keep feet dry and ventilated in all conditions and provides 360° climate comfort by keeping water on the outside while enabling perspiration to easily escape from the inside.

BOA[®] FIT SYSTEM

Providing a strong connection to your shoe's traction, the BOA[®] Fit System gives you the control and power. Dial in to effortless precision so you can play all day with confidence. Lightweight, waterproof, and ultra-durable, the BOA[®] Fit System is engineered to perform in all conditions — anytime, anywhere.
