

SuperStroke

SUPERSTROKE TRAXION

NO TAPER TECHNOLOGY® | Even Grip Pressure Patented No Taper Technology® creates even grip pressure for a more consistent stroke. Parallel design has uniform lower hand profile to minimize grip pressure and maintain putter head path for a more consistent stroke.

TRAXION™ CONTROL | Enhanced Feedback Zones Building on the superior feel and playability of the original SuperStroke putter grip, the new Traxion™ offers an advanced surface texture design for enhanced feedback. The strategically designed Traxion™ zones on the tacky polyurethane outer layer offer an amazing comfortable feel leading to greater overall confidence.

TECH-PORT | Advanced Putting Performance Designed to accept all SuperStroke “Tech-Port” accessories including the CounterCore weight system to engage the larger muscles for a more stable and repeatable putting stroke. Utilizing such muscles helps to reduce putter face angle rotation caused by wrist manipulation while improving putting stroke path for greater consistency.

SPYNE™ TECHNOLOGY | Repeat Hand Positioning Advanced Spyne™ Technology is specifically engineered to aid in repeatable hand positioning. Repeatable hand placement leads to greater consistency in squaring the putter face at time of impact during the stroke.
