

GOLFBUTLER

GRIPS CATALOGUE

MCC PLUS 4 GRIPS

With a 4.6% larger outside diameter in the lower hand, the Plus4 encourages lighter grip pressure. Promoting less tension in the hands and more fluidity throughout the swing creates more power

MULTI COMPOUND ALIGN GRIPS

When installed on a shaft, the red ridge rises and extends down the back of the grip to aid better hand alignment and more consistency, locking the hands in place every time. Heightened club face awareness throughout the swing promotes a square club face both at address and impact.

EA276 tour velvet super tack black midsize

GOLFPRIDE CP2 GRIPS

The **CP2 Wrap Grip** is **Golf Pride's** softest performance, comfort grip. The exclusive Control Core technology reduces torque by 41% compared to a grip without the core, and a soft rubber with a detailed texture provides both comfort and traction. A reduced taper in the lower hand encourages lighter grip pressure

GOLFPRIDE Z-GRIP CORD

The firmest cord grip available from Golf Pride®. Combining two layers of texturing for feedback and control, the Z-Grip features a deep “Z” shaped texture pattern that winds vertically around the grip for control, while a heavy cord texture throughout provides moisture management.

GOLFPRIDE TOUR 25

The Tour 25® is the lightest rubber swing grip from Golf Pride®.

At only 25 grams, this lightweight model is the perfect replacement grip for drivers and fairway woods that use a light grip as a component.

Installed on a standard weighted club, it increases swing weight 4-5 points.

Distinctive white rings painted around the logo give the Tour 25 a contemporary design.

Golf Pride's new oversized putter series called TOUR SNSR™ features larger Tour-proven shapes that are engineered with innovative SNSR material that delivers unsurpassed Tour-level feel and feedback. The new grips are made of a soft-tuned rubber formulation that gives these grips an extraordinary feel, and encourages a lighter grip pressure that golfers seek in creating a smooth stroke. The new SNSR compound also enhances Tour-level feedback into the hands to improve player distance control.

With over 100 patents in golf, Winn golf grips are quite possibly the best grips you could possibly put on your golf clubs. The ideal grip for golfers with latex allergies, Winn golf club grips use polymer instead of rubber. This technology offers better grip, better shock absorption and promotes a tension-free swing.

WINN DRITAC GRIPS

The Dri-Tac Series is our tackiest ever. Our WinnDry polymer material combines a comfortable feel with exceptional non-slip performance in all weather conditions. Rain or shine, the Dri-Tac

WG0310 WINN DRITAC LT (Less Taper) Oversize

Winn's new Dri•Tac LT was designed with a less tapered profile that offers a larger lower hand. This feature offers better control and lighter grip pressure. For golfers suffering from arthritis or hand injuries, the larger lower profile provides easier gripping for less pain and fatigue. Dri•Tac material provides the shock absorption, non-slip comfort and performance found in all Dri•Tac grips.

SUPERSTROKE TRAXION

SuperStroke

NO TAPER TECHNOLOGY® | Even Grip Pressure Patented No Taper Technology® creates even grip pressure for a more consistent stroke. Parallel design has uniform lower hand profile to minimize grip pressure and maintain putter head path for a more consistent stroke.

TRAXION™ CONTROL | Enhanced Feedback Zones Building on the superior feel and playability of the original SuperStroke putter grip, the new Traxion™ offers an advanced surface texture design for enhanced feedback. The strategically designed Traxion™ zones on the tacky polyurethane outer layer offer an amazing comfortable feel leading to greater overall confidence.

TECH-PORT | Advanced Putting Performance Designed to accept all SuperStroke “Tech-Port” accessories including the CounterCore weight system to engage the larger muscles for a more stable and repeatable putting stroke. Utilizing such muscles helps to reduce putter face angle rotation caused by wrist manipulation while improving putting stroke path for greater consistency.

SPYNE™ TECHNOLOGY | Repeat Hand Positioning Advanced Spyne™ Technology is specifically engineered to aid in repeatable hand positioning. Repeatable hand placement leads to greater consistency in squaring the putter face at time of impact during the stroke.
