

# 2020 Masters club range

# YOUR GAME STARTS HERE.

Designed with playability in mind, the GX1 is a great package club set for the casual golfer or a new starter.

## GX1 Clubs

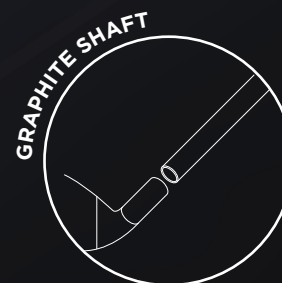

The clubs have been specifically designed to offer good control, distance and flight. Naturally forgiving, the clubs also help build player confidence and skill level. Available in mens and womens sets with graphite or steel shaft options.

## GX1 Bag

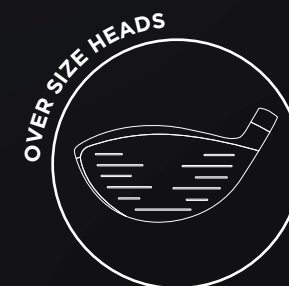

The GX1 package club set also comes with a matching well specified, light weight stand bag; featuring a 6 way divider, automatic stand base and padded shoulder carry straps for on course comfort.

Comfortable padded strap distributes the weight of the bag evenly across both shoulders.

The graphite option is a lighter shaft that allows for a faster swing speed and increased distance.

More forgiving on those off-centre shots these club heads help improve confidence in less experienced players.

A lower centre of gravity makes these clubs more forgiving and helps create a better launch.

These stylish grips have specially designed surface texture to provide increased feeling between player and club.

The cavity behind the centre of the club face provides more perimeter weighting and makes these irons easier to hit.
